[] Tests

25X1

25X1

1. [] has been designated the R&D engineer to participate at [] in the forthcoming [] tests. [] left for NATCA, 29 April 1957 to prepare the equipment for testing. It is anticipated that the installation and final checking of the equipment will be completed approximately two weeks after his arrival.

2. As discussed with you, this series of tests is considered to be of an "operational evaluation" nature. It is therefore requested that you develop the test plan and furnish guidance and act as coordinator of the various aspects of the tests. Although we are furnishing personnel at each end of the test circuit, we would like to relieve them at the earliest possible time, so that they may return to their positions in the R&D Laboratory.

3. Please keep us informed of the progress of the evaluation and feel free to call on us for technical assistance as required.
